

Nilfisk Carpet and hard floor restoration cleaning

Nilfisk MX 103C/MX 107C/MX 307H/MX 328H/MX 585 Multi

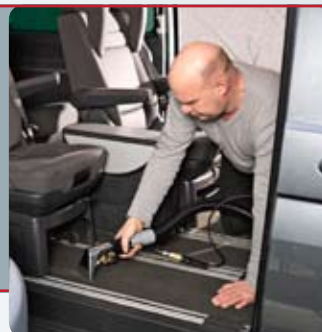

Hot or cold extraction for better carpet restoration

The new Nilfisk MX range of carpet cleaners represents the most modern and efficient carpet restoration machines on the market.

Good quality deep cleaning and restoration technique is an essential element in protecting a carpeted flooring investment – ineffective surface cleaning is quite inadequate. This Nilfisk range offers both cold water and hot water extraction and a host of super features, such as the unique and proprietary Evolution injection and extraction wand, and an in-line heater to provide instant hot water.

When it comes to carpet care, nobody does it better than Nilfisk!

Cobra DT detail tool is ideal for corner and edge cleaning in hard to reach tight spaces

If cold water were as effective as hot for cleaning purposes, then we would all be washing our hands, clothes and dishes in cold water. But we know this is not the case. To remove grime, oil and grease, heat is needed to get the quickest and best cleaning result.

Hot water makes the difference, which is why the Nilfisk MX hot water extractors are the best in their class.

Quality counts in carpet care

For quick clean-up or spot cleaning of carpets and upholstery, the MX 103C provides an economic and easy-to-use professional solution. The combination of excellent design, performance-matched pump, and powerful vacuum leaves a clean and almost dry finish that is quickly ready for normal traffic.

- Compact size & easy handling makes it ideal for spot and stain removal
- Tank emptying made easy thanks to large cap lid
- Air filter automatically cleans exhaust air
- Versions with carpet tool or hand held upholstery tool for flexibility

MX 103C

Handy and easy-to-use

The Nilfisk MX 107C represents excellent value in efficient carpet cleaning. Compactly designed with large, non-marking wheels for easy transportation, this efficient unit features 7-bar pump pressure with no priming necessary. This performance is enhanced by the 3-stage vacuum that leaves carpets clean and almost dry.

- Spray pump requires no priming for reliable performance
- Easy-empty drain saves downtime
- 4.6 m of crush-proof vacuum hose supplied as standard

MX 107C

Cold water carpet care

The MX 103C is ideal for quick clean-up jobs and spot cleaning

The single-bend, stainless steel wand is durable and easy to use

Hot water dramatically improves the cleaning result

For thorough restoration jobs on carpet or upholstery, hot water cleaning is by far the most effective. The MX 307H features an in-line heater to provide hot water on demand for fast, efficient cleaning. The unique Evolution injection and extraction wand, the most advanced tool of its kind on the market, is included as standard equipment.

- In-line heater provides instant on-demand hot water
- Hot water pressure spray ensures deep cleaning
- 4.6m of crush-proof vacuum hose supplied as standard

MX 307H

Exceptional value with hot water efficiency

The MX 328 H features high heat and low moisture. It is an accepted fact that increased temperature while cleaning increases the chemical activity and cleaning effectiveness. Low moisture cleaning ensures that carpets will dry quicker, reducing down time and the possibility of mould growth. With on-demand instant hot water to 100°C, leading-edge features, and the unrivalled Evolution injection, the performance is outstanding.

- Highly effective hot water cleaning of carpets & upholstery
- Easy to adjust pressure for carpet or upholstery cleaning

MX 328H

Low moisture cleaning

The MX 307H is ergonomically designed for easy and productive operation

Cleaning with a low moisture machine allows carpets to dry faster, minimizing downtime

Hard floor restoration

Think of a machine with the capability of high pressure cleaning and drying tiled floors in a single pass. And imagine that same machine then being used as a carpet extractor. This unique '2-machines-in-1' concept is now a reality in the form of the Nilfisk MX 585 Multi. The net result of this latest Nilfisk innovation is a massive increase in productivity, and significant savings in the cost of professional cleaning.

Deep cleaning tiles, and more importantly the grout between tiles, is now a simple one-pass operation. The machine sprays high pressure (83 bar) cold water and immediately vacuums the residue, to leave a clean, dry surface. A simple tool change then allows the MX 585 Multi to be used as an efficient carpet extractor.

- 2-machines-in-1 concept saves both investment and operating costs
- Efficient grout cleaning capability prevents build up of harmful bacteria
- Automatic filling & dumping of water allows uninterrupted cleaning

The hand tool can be used in hard to reach areas and on walls

Suitable for both hard and soft floors

MX 585 Multi

Auto dump feature for continuous use

In one cleaning pass of the Turbo wand, this machine cleans, rinses, and extracts water and soil leaving floors clean and nearly dry

EVOLUTION – Less weight, more efficiency

If you thought that all carpet cleaning tools were the same, then think again. The Nilfisk Evolution wand represents a true breakthrough in efficient design. Through our thorough understanding of the dynamics of air flow, we have been able to dramatically improve water recovery performance. This means that carpets are not only thoroughly cleaned, but are left almost dry for a fast return to normal traffic. At the same time, the weight of the wand is far less than with standard industry extractor wands. This means less operator fatigue and greater productivity.

- Designed to utilize the benefits of laminar air flows
- The first rotationally-moulded carpet extractor wand
- Twice as effective as standard wands in removing carpet moisture
- Enhanced moisture-removal performance a key factor
- Combines both solution injection and vacuum removal
- Lightweight and easy to use
- The state-of-the-art in carpet cleaning wands
