DM3 PN

Single phase industrial vacuum with automatic reverse pulse filter cleaning

The DM3 PN is an industrial vacuum cleaner equipped with large surface cartridge filters (antistatic, filtration class M), which are constantly and frequently cleaned by means of powerful jets of compressed air.

Reverse pulse filter cleaning is the most efficient system when vacuuming fine, dry or clogging dust, especially when used on continuous duty or to collect large volumes of dusts.

- The most compact of the single phase vacuum cleaners with pneumatic filter cleaning system
- High filtration efficiency.
- Robust, compact and easy to use.
